

We are an innovative startup that contributes to the transformation of the global recruitment market. Our application, created in Silicon Valley, is a mobile-first application that directly connects recruiters and candidates preselected by a matching algorithm. You can participate directly to an exciting project that will drive a sea change in the global recruitment experience. Join our team and support us in our deployment in Asia! We are recruiting:

Javascript Web Developer

We are looking for a JavaScript Web Developer who is motivated to get wide responsibilities within a light and business oriented team. Working directly with the founders, your mission is to ensure continuous optimization and maintenance of the application (desktop and mobile) for speed and scalability.

Responsibilities

- Develop new user-facing features and modify them in accordance with user experience inputs
- Ensure the technical feasibility of UI/UX designs
- Translate business needs into innovative technical solutions
- Ensure efficient performance and scalability of solutions
- Ensure daily maintenance of the application (mobile + desktop)
- Collaborate with remote team members abroad

Profile

- Degree or equivalent qualifications in Computer Science, Computer Engineering or related fields
- Strong understanding of JavaScript, its quirks, and workarounds
- Good understanding of web markup, including HTML5 and CSS3
- Competence in Git and Responsive Design
- Meteor Knowledge would be a plus
- Good grasp of mobile web development
- Excellent analytical skills, a good dose of initiative and loads of creativity

Offer

- An exciting entrepreneurial adventure in a B2B-B2C market that is undergoing rapid transformation
- International business exposure and work environment
- Opportunity to participate to the growth of a startup at the forefront of business transformation with ambitions to expand to global markets

Contract type

- Internship or Freelance
